

## PRESS RELEASE

### Ocean Global Releases Rare OTC Solution for Vertigo

*Ocean Global releases a new over-the-counter solution for relieving vertigo symptoms in a market that generally requires prescription medication.*

Tampa, Florida (PRWEB) December 04, 2012 - Ocean Global introduces [DiVertigo](#), an all natural, over-the-counter solution for relieving vertigo symptoms. Vertigo is typically treated with prescription medications. Very few options exist on the market for treating vertigo without a prescription or without side effects. DiVertigo is now available in retail stores and pharmacies nationwide.

According to a [study](#) by the American Headache Society, vertigo affects 5-10% of the population or up to 31 million people in the United States. Vertigo can be debilitating with symptoms that include dizziness, nausea, disorientation, and a spinning sensation. While it occurs more often in women ages 50-60 or the elderly, anyone of any age or gender can experience vertigo, as it is tied to problems in the inner ear. Traditionally, prescription medications have been required for treatment, leaving the patient with side effects like drowsiness and dry mouth. This is particularly frustrating for individuals who have vertigo episodes over the course of months or even years.

However, the new, all natural DiVertigo is a great alternative, because it can be taken on a daily basis without the side effects and can be purchased without a prescription. It works quickly (typically 3-5 minutes) to restore equilibrium and balance and contains no drugs, artificial additives, or stimulants of any kind. Sufferers of Benign Paroxysmal Positional Vertigo, Meniere's symptoms, Labyrinthitis, and other vestibular disorders have found relief using DiVertigo.

"Vertigo and the dizziness that accompanies it, can wreak havoc on a person's quality of life," says CEO, Jamie Petersen. "DiVertigo is a wonderful way to relieve vertigo naturally without the dependence on regular prescription medication."

#### Ocean Global

Ocean Global, founded in 1998, works with herbal products in order to provide safe and effective alternatives to the health market. Motion sickness and vertigo are areas where medications on the market do not seem to adequately address and relieve related symptoms without side effects. In response, Ocean Global has formulated unique combinations of essential oils to provide quick relief from these ailments. Much of Ocean Global's success comes from working with only the highest quality ingredients and their outstanding customer service.

MotionEaze and DiVertigo can be found in large national chains like Walmart and CVS pharmacies. They may also be purchased online at their respective web sites—[motioneaze.com](#) and [di-vertigo.com](#).
